

Alert : HR team

Are you using AI
Assistants to
process candidate
data?

Here are 3 major
consequences of
sharing sensitive
candidate data with AI
Assistants!

1 **Security Risks**

Breaches in AI systems handling candidate data can lead to identity theft, harassment, or misuse of personal information.

2 Privacy Violation

Candidates' privacy is compromised as their data may be used for purposes beyond the original context. (Example: Training AI models without their consent)

3 Reputation Damage

It can damage candidate reputation and job prospects leading to legal action against the organization.

Change human cyber security behavior with

security[®]
quotient.
