# Security Best Practices for HR while using AI Assistants

# Obtain Informed Consent

Obtain consent from candidates before processing their personal information through AI assistants. Provide the option to opt-out if they have privacy concerns.

# Anonymization of Candidate Data

Implement anonymization techniques to remove or modify Personally Identifiable Information from employee/ candidate datasets before sharing with AI assistants.

# Regular Security Audits

Collaborate with IT team to conduct regular security audits of AI assistants to ensure compliance with data protection regulations and internal security policies.

# Change human cyber security behavior with

security<sup>®</sup>  
quotient.
